

NEW!

FIELDNET™ WITH WATERTREND™

FIELDNET™
BY LINDSAY

IF KNOWLEDGE IS POWER, THIS IS A TURBOCHARGER.

FieldNET with WaterTrend

Know more to grow more.

FieldNET with WaterTrend gives growers the information they need to make effective and efficient irrigation decisions.

Using advanced data, science and modeling technology, the new WaterTrend feature provides a 7-day water outlook on forecasted crop water usage and precipitation amounts - taking into account field-specific forecasted rainfall amounts, crop growth stage and crop water usage information. Growers can see trends in how their crops are using water, enabling them to make better, data-driven decisions on when and how much irrigation is needed.

Best of all, WaterTrend is included with every subscription for FieldNET-equipped center pivots – bringing even more value to FieldNET users.

Key features and benefits:

- Provides 7-day water outlook based on field-specific forecasted rainfall amounts, crop growth stage and crop water usage information
- Shows trends of water refill or depletion in soil profile
- Enables effective and efficient irrigation planning
- Accessible via the FieldNET app - no additional subscription or equipment is needed for FieldNET-equipped center pivots
- Easily upgradeable to the full FieldNET Advisor™ subscription to receive daily, automated irrigation recommendations

WATERTREND GIVES YOU:

**NEXT 7-DAYS
WATER USAGE**

**NEXT 7-DAYS
PRECIPITATION**

**CURRENT CROP
GROWTH STAGE**

**LAST 24 HOURS
RAINFALL**
